

Lucidity 365 Modern Workplace

The modern workplace changes rapidly. With many applications moving to the browser, the traditional desktop approach is no longer viable for many businesses. Our solution, Lucidity 365 gives you a modern, customisable browser-based workspace.

You can simplify access to all of your documents, applications, systems and social media from a single location, and deliver a personalised branded workspace.

Integrated with Office 365; all your emails, SharePoint and OneDrive documents and web-based applications are accessible through a simple web page across all devices.

Lucidity 365 can also integrate with your legacy hosted applications that have traditionally required a remote desktop solution like Managed Desktop to access. These applications can be delivered via a tab in your browser, or as a remote desktop application.

Lucidity can streamline all your business applications from all different platforms into one simple to access system your team can access from any device.

Lucidity 365 Modern Workplace

- Branded, customisable workspace portal, accessible from any device.
- Office 365 Single Sign-on for authentication across all your SaaS and hosted applications. One password to remember.
- Leverages Microsoft Office 365 email and document collaboration solutions.
- Aggregates OneDrive, SharePoint, file servers and 3rd party document storage tools in a single view.
- Access your documents utilising online or local versions of Office, all launched from the workspace.
- Access hosted line of business applications directly in a browser tab e.g. MYOB EXO, Account Right, Accredo, SAP Business One, Dynamics AX and other apps.
- Unification of all your IT systems and applications across one modern browser based solution.

"Anyone who wants a testimonial from me, Lucidity 365 is the way to go!"
